EPA/DOGGR/Water Board UIC Meeting

1. News/General Updates - anything to report?
2. Overview/Status of AE packages –
 - what's up with Arroyo Grande? We've been promised the reply to EPA April 17 letter for many weeks.
 - When is Round Mountain going out again for a second comment period?
 - Fruitvale comment period closed, will there be a second comment period on Fruitvale?
 - What's next – should we schedule presentations for Mt Poso? Livermore?
 - It would be useful to get a thorough update on the Elk Hills Phase I package since this package is linked to our Class I wells. I have not drafted a letter as a follow up to our meeting with them last month because we are waiting on this package, but it's getting closer to the time to see if this package is going to float. We may need to put them under an order to get the UIC application done. If the package is not going to make it, we would want a Plan B.
 - and now, for real, which packages have made it in by the 8/15 deadline and which have not? What will have to shut in?
 - How do we get operators to acknowledge it was their lack of urgency that will result in shut it?
 - Project by Project (PbP) Reviews to be factored into AE packages – what is the plan?
3. 11 Aquifers Historically Treated as Exempt – awaiting response from State on EPA's "bait and switch" comments on the draft notice
4. Reminder of Sept 15 final report deliverable due on Category 1 and 2 wells per EPA May 17 letter.
5. Update on Searchable database
6. Action Items/Follow Up
